

How to use Genially

to create your own content (1/2)

What is Genially?

Genially is an online tool that helps you create interactive and engaging content—without needing to know how to code.

With Genially, you can make presentations, infographics, interactive games and quizzes, learning activities, and so on.

How to use it?

Access Genially on the web

Go to <https://app.genially.com>

Create an account or log in

Start a project from a template

- 1 On the homepage, select  **Start from a template**
- 2 Type what you are looking for in the search bar - here "country quiz" - and click the  search icon
- 3 Narrow the results by selecting categories - here "Games and challenges"
- 4 Browse the results and click one to see more details
- 5 Found one you like? Click **Use this template** at the bottom of the page

How to use Genially

to create your own content (2/2)

Customise the template

Rename your project

- 1 Click the template's title to modify it - you can also add a description; then click **Save**

Save your work

- 2 Click  next to the title to save your work;  means everything is saved

In the left toolbar

- 3 Add **Text** and modify its font, colour, etc.
- 4 Insert **Resources**: images, sound effects... from Genially's library or upload your own
- 5 Change the **Background** by choosing a new colour or uploading an image from your device

By clicking an element

- 6 The top toolbar allow you to adjust position, opacity, colour, etc.
- 7 Click **Interactivity**, **Animation** or other purple button to edit the element
- 8 Click the **three dots** to find more actions, like Copy, Paste, Delete, etc.

Test your project

- 9 Click  **Preview mode** at the bottom-right corner to see your project in action
